

# Joint Meeting of the 29<sup>th</sup> International Geographical Conference of Taiwan and the 2025 Annual Conference of the Geography Society of China Located in Taipei

( CFP Second circular )

## Geographies of Senses: Human Senses, Monitoring Technology, and Innovation for a Resilient Taiwan Environment

Conference Date: April 26-27, 2025

Conference Venue: National Taiwan Normal University

( Due date for abstract submission: January 3, 2025 )

The International Geographical Conference of Taiwan (IGCT) and the The Geography Society of China Located in Taipei will jointly host the annual meeting for 2025. The two bodies' conferences have a long history in the field of geography in Taiwan. Both are important platforms for domestic and foreign geographers and scholars to gather together in Taiwan. The theme of this joint conference is based on the rapid changes in contemporary information technology and the increasing significance of humanistic awareness, which jointly make geographical environment knowledge production and problem solutions more flexible and complex, and make the tools and media of geographical environment knowledge production more important. For such rationale, the main focus of this conference is developed.

The 2025 Geography joint meeting will be hosted by the Department of Geography at National Taiwan Normal University, to provide a knowledge feast for geographers, experts, students, government agencies, social groups, and related practitioners to explore geography and share Taiwan geography research results. We work for the joint meeting to recruit and intensify transdisciplinary development of geography from awareness of human senses, sensing, and induction, so as to open up the sharing of diverse knowledge among geographers and related environmental researchers for a transdisciplinary future.

This joint meeting aims to produce knowledge and share and discuss results of geography and environment-related research by making good use of human senses and varied sensing and monitoring technologies. The sub-topics of the meeting are broad and diverse. Please feel free to contribute research papers and results to participate in this exciting event.

- |  |  |  |
|--|--|--|
| • Sense, perception and environmental education      | • Senses and traditional cultural wisdom         | • Sensory culture and human social development                   |
| • Soundscape, olfactory and cultural Landscape       | • Population, migration and sensory sciences     | • Senses, memory and identity                                    |
| • Landscape therapy                                  | • Human social ecology                           | • Ecosystem service and environmental resilience                 |
| • Environmental changes and political ecology        | • Environmental hazards and social risk analysis | • Remote-sensing and its application                             |
| • Zero-net and economic structural transformation    | • AI and Geographical Data Sciences              | • Quantum Computing and Complexity                               |
| • e-DNA and Environmental Sciences                   | • e-DNA for island resilience                    | • e-DNA for knowledge production and application                 |
| • Living, gathering, hunting and indigenous cultures | • ESG of enterprises                             | • Sensing and application of climate change knowledge production |
| • Resilience for community sustainable development   | • Frontier for transdisciplinary geography       | • Other environment-related issues                               |

This joint meeting is now soliciting papers. We sincerely invite you to submit papers and to exchange ideas and research for nurturing the field of geographical environment and to further open up cutting-edge research. This geography joint meeting also welcomes research related to various scientific subfields and other humanities, society, nature and technology-related research results. The local organizing committee will do its best to facilitate transdisciplinary and collaborative dialogue for developing sensing-related geographical and related research. Scholars and experts are also welcome to submit self-organized workshops and forums.

The joint meeting will be held at National Taiwan Normal University on April 26-27, 2025. Paper contributors please complete online registration forms before January 3, 2025 (Friday). Please fill in (all) author names, the title and abstract of the papers to be presented, and choose the topic category for your paper. The submission procedure will be completed once the organizer replies to your submission. If you do not receive a reply, please call us for confirmation. The LOC will notify you the results of the abstract review on January 20, 2025. In order to complete the electronic conference manual, authors are allowed to upload the abstract of their paper again before February 20, 2025. If the abstract of the paper has not been changed, there is no need to upload it again.

For those who wish to participate in the Outstanding Paper Award for Students and Young Experts and Scholars, and Outstanding Paper Award of Group Member, the deadline for submitting full papers is March 27, 2025 (Thursday). The awardees will be invited to submit the awarded papers for publication in "Journal of Geographical Research" or "Annals of the The Geography Society of China Located in Taipei". (For further details of "Group Paper Award" regulation, please refer to the The Geography Society of China Located in Taipei's regulation.
